During the school holidays, we will explore dramatic play, characters, improvisation, text, imaginative play and creativity, as well as mask creation. Students will have the chance to explore their own creative potential while sharing and collaborating with the group. We will play together in a dramatic way and discover untold stories. We will present a final performance at the end of the week via video recordings, which will demonstrate skills learnt through the week! Speaking the language of children, that of play, we will have playful, joyful and exciting holidays!

We will explore "Astronauts" and "Aliens". Both themes are specifically created to address the online learning platform. Students will be in their own "spaceships", communicating between ships and exploring new planets and confronting challenges in outer space. The themes address the questions of confinement and the recent COVID-19 pandemic in a symbolic and creative way: we are like astronauts, isolated on our ships, unable to go outside without protective equipment like masks and helmets, and we must be courageous like all astronauts are. Astronauts are serious characters, Aliens are silly characters, so children who choose to enrol in both courses will have the opportunity to play with both styles and get an all-round experience of drama!
